Minitab Web App

Release 11 July 2024

Issues Resolved

- There is unintended behavior with menu focus. (TT 183413)
- The font changes with projects pulled from one version of Minitab to another. (TT183443)
- Expression parsing fails due to regional setting. (TT187060 / TT187063)
- Copy and Paste do not function as intended in distribution fit. (TT184908)
- The Subset dialog includes untranslated strings.
- Validation for probabilities summation is incorrect in certain edge cases.
- Help ID is incorrect in Response Optimizer interactive mode.
- There is unintended behavior with Distribution Analysis, Nonparametric when combined with Empty groups.
- Titles and subtitles overlap tooltips. (TT182798)
- There is unintended behavior with Simplex Design Plot. (TT186557)
- In extreme variable count cases, the performance has been improved for Line Plots in Graph Builder.
- Some radio buttons do not correctly indicate the selection state.
- Help target is incorrect for Nonparametric Capability output.
- Storage of an invalid formula results in an error message that does not display correctly.
- Nested terms in GLM prevent Compare from functioning correctly.
- A variable is copied instead of moved in the Scatterplot grid in Graph Builder.
- Date validation fails to recognize specific date formats in some Regression dialogs.
